

Szárúzandó terület

The diagram is a technical site plan. A large, irregularly shaped area is shaded in light blue and labeled 'Szárúzandó terület' (Drying area). To the right of this area, there is a red-outlined square structure with a smaller square inside, labeled 'csennyvíztisztító' (Sewage treatment). A brown line, representing a pipe or canal, runs from the top right towards the bottom right, passing near the treatment structure. There are three blue dots: one at the top right, one at the bottom right, and one on a blue line at the bottom right. The entire plan is bounded by black lines representing property or site boundaries.
